CONTENTS

Sulfuric Acid Treatment of Cotton Seed. R. G. ARCHIBALD 1
Black Arm Disease of Cotton with Special Reference to the Existence of the Causal Organism *B. Malvacearum* within the Seed. R. G. ARCHIBALD 5
The Use of Collodion Sacks in Obtaining Clear Soil Extracts for the Determination of the Water-Soluble Constituents. W. H. PIERRE AND F. W. PARKER 13
The Occurrence of Yeasts in Soil. R. L. STARKEY AND A. T. HENRICI 33
Studies on Some Obligate Thermophilic Bacteria from Soil. WILLIAM A. FEIRER .. 47
Minnesota Glacial Soil Studies: II. The Forest Floor on the Late Wisconsin Drift. FREDERICK J. ALWAY AND PAUL M. HARMER 57
Minnesota Glacial Soil Studies: III. Density of the Surface Foot in Forest and Prairie on the Late Wisconsin Drift. PAUL M. HARMER 73
Book Reviews 81
The Influence of Boron on the Growth of the Soybean Plant. GILBEART H. COLLINGS 83
Organic Matter Changes in Two Soil Zones, as Influenced by Difference in Form, Fineness, and Amount of Calcic and Magnesic Materials. W. H. MACINTIRE, W. M. SHAW AND ESTHER M. CRAWFORD 107
The Phenomena of Contraction and Expansion of Soils When Wetted with Water. GEORGE JOHN BOUYOUCOS 119
Colloidal Behavior of Soils and Soil Fertility: III. Cation Replacement and Saturation of Soil with Ca. J. S. JOFFE AND H. C. MCLEAN 127
A Study of the Factors Influencing the Efficiency of Different Forms of Nitrogen as Related to Soil Type and Cropping System in the Atlantic Coastal Plain Region: Part I. ARTHUR MATTHIAS SMITH 137
Fertility of a Soil as Related to the Forms of Its Iron and Manganese. P. H. BREWER AND R. H. CARR 165
Outgo of Calcium, Magnesium, Nitrates and Sulfates from High-Calcic and High-Magnesic Limes Incorporated in Two Soil Zones. W. H. MACINTIRE 175
Potassium Content of Plants as an Indicator of Available Supply in Soil. J. W. AMES AND R. W. GERDEL 199
Effects of Some Electrolytes on Kaolin and the Probable Relation to the Soil. JOHN R. SKEEN 225
Differences in the Heat of Reaction Between Artificial and Soil Gels of Silica, Alumina, and Iron with Hydroxides. GEORGE JOHN BOUYOUCOS 243
Book Review 249
A Research Professorship in Forest Soils at Cornell University 251
On the Existence of Daily Changes in the Bacterial Numbers in American Soil. H. G. THORNTON AND R. A. FISHER 253
Studies of the Removal of Nutrients from Subsoil by Alfalfa. C. E. MILLAR 261
The Microflora and the Productivity of Leached and Non-Leached Alkali Soil. J. E. GREAVES 271
The Normal Moisture Capacity of Soils. CHARLES F. SHAW 303
The Hydrometer as a New and Rapid Method for Determining the Colloidal Content of Soils. GEORGE JOHN BOUYOUCOS 319
Book Review 333
Effect of Fertilizers on the Germination of Seeds. JACOB L. MAXTON 335

M.F.M.

The Hydrometer as a New Method for the Mechanical Analysis of Soils. GEORGE JOHN BOUYOUCOS.... 343
Effect of Moisture, Temperature, and Other Climatic Conditions on *R. Leguminosarum* in the Soil. S. C. VANDECAVEYE.... 355
Effect of Local Influences in Modifying the General Atmospheric Conditions. ALFRED SMITH.... 363
Method of Preparation of Soil Suspensions and Degree of Dispersion as Measured by the Wiegner-Gessner Apparatus. GEORG WIEGNER.... 377
Further Studies on Michigan Soils Profiles with Special Reference to Dispersed Materials. M. M. MCCOOL, A. G. WEIDEMANN, AND G. SCHLUBATIS.... 391
Factors Affecting the Hydrogen-Ion Concentration of Soils. L. D. BAVER.... 399
Book Reviews.... 415
Carbon Dioxide Evolution of Soil and Crop Growth. HENRIK LUNDEGÅRDH.... 417
The Seedling Plant Method of Determining Soil Nutrient Deficiency. J. W. AMES AND R. W. GERDEL.... 455
The Possible Rôle of Iron Depositing Bacteria in the Formation of Hard-Pan. C. S. MUDGE.... 467
A Study of the Soils of Hidalgo County, Texas, and the Stages of Their Soil Lime Accumulation. HERMAN W. HAWKER.... 475
A Study of the Colloidal Fraction of Certain Soils Having Restricted Drainage. W. L. POWERS.... 487
Book Reviews.... 493

ILLUSTRATIONS

PLATES

BLACK-ARM DISEASE OF COTTON WITH SPECIAL REFERENCE TO THE EXISTENCE OF THE CAUSAL ORGANISM B. MALVACEARUM WITHIN THE SEED

Plate 1. Fig. 1. Transverse section of Black Arm infected cotton seed showing bacilli in a resin canal 11
2. Section of Black Arm infected cotton seed with bacilli in the cotyledon tissues 11

THE OCCURRENCE OF YEASTS IN SOIL

Plate 1. Twelve Species of Yeasts Found in Soils 45

MINNESOTA GLACIAL SOIL STUDIES: II. THE FOREST FLOOR ON THE LATE WISCONSIN DRIFT

Plate 1. Illustrations Showing Character of Woods at Hamel and Taylors Falls 71
Fig. 1. Wood II of the Hamel group. The cordwood, shown in the foreground, had been cut between the time of sampling and that of taking the photograph, in September, 1919 71
2. Interior of Wood III at Taylors Falls, with dense growth of ferns in foreground 71
3. Interior of Wood III at Hamel 71

THE INFLUENCE OF BORON ON THE GROWTH OF THE SOYBEAN PLANT

Plate 1. The Type and the Extent of Boron Injury on the First Pair of Leaves of Representative Plants which Received Equivalent Quantities of Boron as Boric Acid, Potassium Borate, and Borax 105

POTASSIUM CONTENT OF PLANTS AS AN INDICATOR OF AVAILABLE SUPPLY IN SOIL

Plate 1. Effect of Ammonium Sulfate and Sodium Nitrate Additions on Growth of Wheat Seedlings 217
Plate 2. Effect of Liming on the Growth of Wheat Seedlings 219
Fig. 1. Unlimed Soil 219
2. Limed Soil 219
Plate 3. Growth of Wheat Seedlings on Soils from 5-year Rotation Plots 221
Fig. 1. Pot 61, unfertilized soil; pot 65, plot 2, acid phosphate 221
2. Pot 69, plot 3, muriate potash; pot 73, plot 5, sodium nitrate 221
Plate 4. Growth of Buckwheat and Wheat in Several Soil Dilutions 223
Fig. 1. Buckwheat 223
2. Wheat 223

STUDIES OF THE REMOVAL OF NUTRIENTS FROM SUBSOIL BY ALFALFA

Plate 1. Fig. 1. These roots grew out around the bottom of the 8-inch cylinders and then turned upward and ramified in the surface soil 269
2. A large number of fibrous roots developed near the point of application of nutrient solution, at the 36-inch depth 269

THE HYDROMETER AS A NEW AND RAPID METHOD FOR DETERMINING THE COLLOIDAL CONTENT OF SOILS

Plate 1. Showing the Dispersing Machine, Cylinder and Hydrometer, in the Determination of Soil Colloids.... 331

THE HYDROMETER AS A NEW METHOD FOR THE MECHANICAL ANALYSIS OF SOILS

Plate 1. Type of Hydrometer, Cylinder, and Mortar Employed.... 351
Plate 2. Curves Showing Rate of Settling of Soil Particles as Measured by Hydrometer 353

CARBON DIOXIDE EVOLUTION OF SOIL AND CROP GROWTH

Plate 1. Fig. 1. Arrangement for determination of the Soil Respiration.... 451
2. The experiment field in 1925.... 451
3. Interior of the field laboratory.... 451
Plate 2. Figs. 1 and 2. Sugar beets from the non-gassed glasshouse 1.... 453
3 and 4. Sugar beets from the gassed house 2.... 453

THE POSSIBLE RÔLE OF IRON DEPOSITING BACTERIA IN THE FORMATION OF HARD-PAN

Plate 1. Fig. 1. Four of the hard-pans used in the studies.... 471
2. Typical fermentation of the iron depositing bacteria studied.... 471
Plate 2. Fig. 1. Colonies obtained by plating powdered hard-pan on Harder's medium 473
2. Filaments within cavities of the hard-pan.... 473
3. Filament seen in figure 2 removed from the cavity and enlarged to 900X.... 473

A STUDY OF THE SOILS OF HIDALGO COUNTY, TEXAS, AND THE STAGES OF THEIR LIME ACCUMULATION

Plate 1. Fig. 1. The third stage of development.... 485
2. Caliche bed over 15 feet thick.... 485

TEXT FIGURES

MINNESOTA GLACIAL SOIL STUDIES: II. THE FOREST FLOOR ON THE LATE WISCONSIN DRIFT

Fig. 1. Map of Minnesota Showing Locations of Woods Sampled.... 58
2. Amount of Nitrogen per Acre in the Forest Floor and in the Underlying 6 Inches of Soil.... 66

MINNESOTA GLACIAL SOIL STUDIES: III. DENSITY OF THE SURFACE FOOT IN FOREST AND PRAIRIE ON THE LATE WISCONSIN DRIFT

Fig. 1. Densities of the Four Sections of the Twelve Fields.... 77

ORGANIC MATTER CHANGES IN TWO SOIL ZONES, AS INFLUENCED BY DIFFERENCE IN FORM, FINENESS, AND AMOUNT OF CALCIC AND MAGNESIC MATERIALS

Fig. 1. Organic-CO_2 Changes Induced in a Loam Soil by Surface-Zone Incorporations of $Ca(OH)_2$, CaO-MgO, 80–100-Mesh Limestone and Dolomite at the Constant Rate of 2000 Pounds of CaO per 2,000,000 Pounds of Soil, Moisture-Free Basis, During 4 Years' Fallow Exposure without Stirring.... 108

THE PHENOMENA OF CONTRACTION AND EXPANSION OF SOILS WHEN WETTED WITH WATER

Fig. 1. Dilatometer for Measuring Volume Contraction of Soils when Wetted with Water.... 120

A Study of the Factors Influencing the Efficiency of Different Forms of Nitrogen as Related to Soil Type and Cropping System in the Atlantic Coastal Plain Region: Part I

Fig. 1. Diagrammatic Cross-section of Cylinder and Case..... 153

Fertility of a Soil as Related to the Forms of its Iron and Manganese

Fig. 1. Precipitation of Aluminum, Ferric and Ferrous Iron, Manganese and Magnesium as Hydroxides and Calcium Bicarbonate as Calcium Carbonate.... 167
2. Nature of the Green Manganese Solution..... 170

Outgo of Calcium, Magnesium, Nitrates and Sulfates from High-Calcic and High-Magnesic Limes Incorporated in Two Soil Zones

Fig. 1. Progressive Calcium Outgo, as Pounds of $CaCO_3$-Equivalent per 2,000,000 Pounds of Soil, from Controls, Surface-Zone and Subsurface-Zone Incorporations of $Ca(OH)_2$ and CaO-MgO during a 4-year Period..... 179
2. Progressive Magnesium Outgo, as Pounds of $CaCO_3$-Equivalent per 2,000,000 Pounds of Soil, from Controls, Surface-Zone Incorporations of $Ca(OH)_2$ and CaO-MgO during a 4-year Period..... 179
3. Progressive Calcium-Magnesium Outgo, as Pounds of $CaCO_3$-Equivalent per 2,000,000 Pounds of Soil, from Controls, Surface-Zone and Subsurface-Zone Incorporations of $Ca(OH)_2$ and CaO-MgO during a 4-year Period..... 180
4. Four-year Outgo of Calcium, Magnesium, and Ca-Mg in Terms of $CaCO_3$ from Surface-Zone and Subsurface-Zone Incorporations of Hydrated Lime, Burnt Dolomite, and CaO-MgO Mixtures at the Rate of 3570 Pounds of $CaCO_3$ (2000 Pounds CaO) Per 2,000,000 Pounds of Soil..... 184

Effects of Some Electrolytes on Kaolin and the Probable Relation to the Soil

Fig. 1. Final Volume of Sedimented Kaolin in Graduates at End of 24 Hours after Shaking with Molar Concentrations of Electrolytes Indicated..... 231
2. Resistance in Ohms of Solutions with and without Kaolin at Various Molar Concentrations..... 232
3. Resistance in Ohms of Solutions with and without Kaolin at Various Molar Concentrations..... 232
4. Rate of Migration of Kaolin Particles in $\pm\mu$ Per Second When Effected by Molar Concentrations of Electrolytes..... 233

On the Existence of Daily Changes in the Bacterial Numbers in American Soil

Fig. 1. Correlation Between Simultaneous Samples Plated on Soil Extract Agar..... 255
2. Correlation Between Simultaneous Samples Plated on Egg Albumen Agar..... 256
3. Correlation Between Simultaneous Samples Plated on Mineral Salts Agar..... 257
4. Daily Counts on Mineral Salts Medium..... 258

The Normal Moisture Capacity of Soils

Fig. 1. Effect of Increased Amounts of Water. Sampled Five Days After Application.. 306
2. Effect of Time on Moisture Distribution When 2.5 Inches of Water Was Applied 308
3. Effect of Quantity on Distribution of Water, Sampled 54 Days after Application 310
4. Distribution of Water in Tubes Receiving a 6-inch Irrigation, after Prolonged Periods of Adjustment..... 312

EFFECT OF LOCAL INFLUENCES IN MODIFYING THE GENERAL ATMOSPHERIC CONDITIONS

Fig. 1. Mean Temperature Range Departures for 1913–1919. 367
2. Mean Maximum 1913–1919 Departure from Latitude Mean. 369
3. August Maximum Temperatures. 373
4. Mean August Temperatures. 374

FACTORS AFFECTING THE HYDROGEN-ION CONCENTRATION OF SOILS

Fig. 1. Description and Reaction Profile of Wooster Silt Loam. 400
2. Variations in Soil Reaction on Four Plots from April 27 to September 23. 405
3. Effect of Surface Treatment on Subsurface Layers. 411

CARBON DIOXIDE EVOLUTION OF SOIL AND CROP GROWTH

Fig. 1. Simple Apparatus for Analyzing the CO_2 Concentration of the Air. 418
2. Apparatus for Estimating the Soil Respiration. 418
3. Scheme of New Apparatus for Accurate Analysis of the CO_2 Concentration in the Air. 419
4. Tool for Drawing Air-Samples from the Soil. 422
5. Borer for Drawing Soil Samples of a Definite Volume from Different Depths. . 423
6. Soil Strata. 425
7. Seasonal Fluctuations of the Soil Respiration, Carbon Dioxide Concentration among the Leaves, Carbon Dioxide Content in the Soil Air, and Climatic Factors—Oats, 1923. 428
8. Seasonal Fluctuations of Soil Respiration, Carbon Dioxide Factor, and Climatic Conditions—Sugar Beets, 1925. 429
9. The Effect of Large Quantities of Farmyard Manure on the Soil Respiration. . 431
10. The Carbohydrate Assimilation of Leaves of Sugar Beets in Relation to the Factors of Light, Carbon Dioxide, and Temperature. 433
11. System of Perforated Iron Tubes for Gassing of Field Plots. 434
12. Arrangement for Gassing of Beets with Carbon Dioxide Evolved from Manure. . 436
13. Apparatus for Analyzing the Carbon Dioxide Content in the Field. 438
14. Arrangement for Securing the Air Samples in the Field. 439
15. Diagram of the Diffusion Currents When the Carbon Dioxide Factor is Below the Standard Value. 439
16. Diagram of the Diffusion Currents When the Carbon Dioxide Factor Exceeds the Standard Value. 439
17. Diagram Showing the Parallelism Between Carbon Dioxide Factor and the Yield of Oats. 445
18. Diagram Showing the Parallelism Between Carbon Dioxide Factor and Yield of Sugar Beets. 445

THE SEEDLING PLANT METHOD OF DETERMINING SOIL NUTRIENT DEFICIENCY

Fig. 1. Potassium Assimilated by Different Crop Plants. 463

A STUDY OF THE SOILS OF HIDALGO COUNTY, TEXAS, AND THE STAGES OF THEIR LIME ACCUMULATION

Fig. 1. Sketch Map of Hidalgo County, Texas, Showing the Location of Its Major Soil Areas. 477

A STUDY OF THE COLLOIDAL FRACTION OF CERTAIN SOILS HAVING RESTRICTED DRAINAGE

Fig. 1. Maximum Percolation on Dayton and Malheur Soils. 488
2. Titration Curves of Soil Colloids. 490
